AUTOMATICALLY CLEANED AT THE PRESS OF A BUTTON

YOUR CORRUGATORS ARE ALWAYS CLEAN. A COMPLETE INTERNAL AND EXTERNAL SOLUTION FOR YOUR PLANT

Evolution

STARCH OFF ULTRA

BATCH CONTROLLER INSTRUCTIONS

1. Calculate volume of product required in gallons.

20% of tank water volume is the amount of solution required.

Thus, divide the volume of your tank by 10, then multiply by 2.

Example

If water tank volume is 140 gal

Then divide 140 gal by 10 = 14

Then multiply 14 by 2 = 28gal = (20%)

2. Enter amount from step 1.

2.1. Press “SEL” button (Circled in green). Use this button to change the amount of ESO required. Once initial set up is done this does not need to be changed.

2.2. Use buttons circled in red for units, tens and hundreds.

2.3. Press “SEL” button when done.

3. Press “START” button on front of case

4. Pump will start up.

5. Once volume is reached the pump will stop.

In the case of an incorrect entry, reset the system by turning the power off for 10 sec and turn back on. Note: RST and PRG buttons are not used in this system.

Use emergency stop button if necessary. System will remember the last setting and metered amount for up to 5 min.

Check numbers entered before starting to ensure correct amount has been set.

EVOLUTION STARCH OFF ULTRA is optimised, unique, simple, safe and effective
