EVOLUTION STARCH OFF ULTRA

AUTOMATICALLY CLEANED AT THE PRESS OF A BUTTON

YOUR CORRUGATORS ARE ALWAYS CLEAN. A COMPLETE INTERNAL AND EXTERNAL SOLUTION FOR YOUR PLANT

Evolution STARCH OFF **ULTRA**

Your rolls automatically cleaned in under 10 minutes...
... at the press of a button!

Before

After

Our Next Step - fully automatic cleaning of the applicator roll.

Mains pressure spray bars clean your rolls according to a program of multiple ESO ULTRA applications and water rinse, all controlled by a pre-programmed PLC and fed from our heat exchange unit through a piping system to the spray bars.

Ease of use and operator safety is achieved with this automatic system.

Your operator simply presses the start button to activate the automatic, hands off cleaning cycle. Ask for our presentation or go to ecochemmoreboxes.com/eso-ultra-spray-bars for more information.
